SUMMARY Electrical Engineer with 15 years experience in Research and Development and electronics manufacturing across defense, municipal, agricultural, broadcast, and entertainment industries

EXPERIENCE **Electrical Engineer, 2023-2026**

McCrometer - Hemet, CA

- Development, manufacture of flow meter tech for agricultural, municipal
- Ownership of design, schematic capture, board bring-up, test, sustainment
- Developed automated test platform for validating firmware before production, eliminating data collisions and increasing data integrity from below 50% to 100%
- Designed, wrote, deployed, image flashing automation tools for production cell

Electrical Engineer, 2020-2023

Design West Technologies - Tustin, CA

- Development, mfg of weapons and chemical detection for US Armed Forces
- Rapid prototyping, design, architecture, schematic, layout, firmware, test
- Delivered critical components of Vertical Launch System (VLS) to U.S. Navy
- Ownership of component requirements, test, manufacture, production

Solutions Engineer, 2018-2019

Laserfiche - Long Beach, CA

- Architecture and deployment of enterprise workflow automation solutions
- Led client discovery interviews and authored statements of work
- Designed, implemented, customized, deployed multi-server system architecture
- Configured databases, built repositories, managed service accounts

Electronics Engineer, 2010-2017

Marshall Electronics - El Segundo, CA

- Development of Audio/Video electronics for broadcast and photography
- Performed board bring-up, circuit analysis, schematic/layout, firmware
- Drafted, implemented iterative testing and development strategy
- Managed technical organization of product and firmware releases

EDUCATION **Bachelor of Science** - Electrical Engineering, 2006-2010

University of Southern California - Viterbi School of Engineering - Los Angeles, CA
